aniket4@illinois.edu

Researching theoretical neuroscience, deep learning theory, & quantum information.

Education

University Of Illinois, Urbana-Champaign — Urbana, IL
B.S. Physics, Specialization in Learning Theory — 2023 – 2027

- High-Dimensional Statistics[G], Deep Learning Theory[G], Dynamical Systems[G], Representation Theory[G], Deep Generative Models, Machine Learning, Stochastic Processes, Quantum Information Theory, Data Structures & Algorithms

[G] *denoting graduate coursework*

Talks & Posters

Approximating Tensor Contractions with Annealed Importance Sampling, — *08.2025*
Poster developed for *QSim 2025, New York, NY*

Quantum Circuit Volume for Graph Models, — *12.2024*
Poster developed for the *Illinois Mathematics Lab Open House*

Research

Computation & Neurodynamics Lab | Urbana, IL — 01.2025 – Present
- Developing symbolic AI methods for Floquet decomposition of linear time-periodic systems using exponential maps with structured generators and implementing closed-form monodromy matrix factorizations.
- Applying block-diagonal parameterizations with zero-mean constraints to neural oscillator networks, enabling analytic recovery of periodic dynamics from discrete trajectory samples without time-ordering integrals for interpretable neural code analysis.
- PI: Dr. Matthew Singh

Lab for Parallel Numerical Algorithms | Urbana, IL — 09.2024 - Present
- Collaborating on the development of a novel Monte Carlo algorithm for contracting general tensor networks, with applications to quantum circuit simulation.
- Investigating randomized methods such as TensorSketch for efficient estimation of trace-like quantities in large-scale tensor networks.
- PI: Dr. Edgar Solomonik

Industry

Space Dynamics Laboratory | Ionospheric Analyst Intern — 05 - 08.2024
- Developed a `Python` scraper to expedite the data collection of NICT ionograms to $600+$ ionograms downloaded per hour.
- Researched numerical analysis methods to improve the noise reduction of ionograms using various filtering methods. Implemented filters in `Python` and `Julia` and ran statistical analysis (PSNR, MSE, SSIM) to compare efficiencies.
- Researched methods to improve automatic ionogram scalers using deep learning architecture (CNNs) and techniques.

| LEARNING | **Independent Study– *Neural Operators for Neuroscience***, | *08.2025-Present* |

Independent Study– *Neural Operators for Neuroscience*, *08.2025-Present*
with Dr. Matthew Singh

QSim Summer School – *NSF RQS (hosted at IBM, NYC)*, *08.2025*
Lectures covering theoretical and experimental perspectives on quantum error correction, simulation, and algorithms.

Uncertainty Quantification & Machine Learning for Physical Systems – *IMSI hosted at the University of Chicago*, *05.2025*
Lectures on Bayesian inference, sensitivity analysis, and physics-informed neural networks, with applications to complex physical systems.

LPNA Reading Group – *University of Illinois*, *01.2025 – Present*
Weekly discussions on random matrix theory, graph partitioning, tensor network applications, and quantum error correction.

OUTREACH

Membership Director *SIAM @ University of Illinois*, *05.2025 - Present*
SIAM@UIUC executive officer. Responsibilities include managing membership status, involvement, and recruitment.

PROFESSIONAL AFFILIATIONS

Society of Industrial & Applied Mathematics, *05.2025 - Present*
Member

SKILLS

Programming: Python, C/C++, Java, Julia, Mathematica

Libraries & Frameworks: NumPy, SciPy, Pandas, Matplotlib, scikit-learn, SymPy, Jupyter

Tools & Environments: Git, LaTeX, Conda, Shell, Jupyter
